TECHNICAL COOPERATION PROJECT FORM**

Project title: Strengthening capacity of Azerbaijan to reduce regulatory and procedural barriers to trade		
Expected timing/ duration: December 2023 – December 2025		
<p>Objective and summary of the project: The objective of the project is to support the government of Azerbaijan in removing regulatory and procedural barriers to trade. At the 7th session of the Steering Committee on Trade Capacity and Standards (Geneva, 27-28 June 2023, ECE/CTCS/2022/2), Government of Azerbaijan requested the UNECE to conduct its flagship Study on Regulatory and Procedural Barriers to Trade (RPBT study). The objective of the project is to support the government in establishing institutional and legislative trade frameworks for ensuring successful integration in global value chains. UNECE has been developing national studies on Regulatory and Procedural Barriers to Trade in several SPECA participating States: Kazakhstan, Kyrgyzstan, Tajikistan, and, most recently, Uzbekistan, as well as Armenia and Georgia in the South Caucasus. A full-fledged RPBT Study consists of five to ten chapters. The proposed project will initiate the study with additional fund-raising to be carried out. The objective of the project will be achieved by implementing the following activities:</p> <p>A1.1. Development of a study on regulatory and procedural barriers to trade in Azerbaijan using the UNECE methodology (selected chapters).</p>		
Link to the SDG targets: 17.1, 17.2, 17.10, 17.11		
Expected results of the project: EA1. Improved national capacities of Azerbaijan to remove regulatory and procedural barriers to trade.
